

Akshansh Vaishnav

Full Stack Developer

 Gurugram, Haryana  +91 95876 60877  vaishnavakshansh2002@gmail.com  Github  LinkedIn  Portfolio

Education

Bachelor of Technology in Computer Science and Engineering Lovely Professional University Percentage: 73.5%	2021 – 2025 Jalandhar, Punjab
Senior Secondary Education - CBSE Lawrence and Mayo Public School Percentage: 75%	2019 – 2020 Kota, Rajasthan
Matriculation - CBSE Lawrence and Mayo Public School Percentage: 90%	2017 – 2018 Kota, Rajasthan

Professional Experience

Front End Developer Intern ProjectX.Cloud (ProjectX Cloud Technologies Pvt. Ltd.) 	March 2024 – March 2025 Remote
- Contributed to the Infinity OS platform frontend using React.js, focusing on enhancing UI/UX and performance. - Collaborated in the end-to-end development cycle, including component architecture, API integration, and performance optimization. - Improved platform usability through iterative design refinements and user feedback integration.	

Skills

Languages JavaScript, Java, SQL, MongoDB	Tools/Platforms Git, GitHub, Postman, Vercel, Render
Frameworks React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Material UI, DaisyUI	Libraries Axios, React Router, Three.js, Zustand, Socket.io, Bcrypt.js, JWT, CORS, Mongoose

Projects

CuraScan 
AI Health Diagnosis System React.js, Node.js, Express.js, MongoDB
- Full-stack AI-powered disease prediction app analyzing 50+ parameters via Flask & OpenAI API. - Implemented JWT and Bcrypt for secure user authentication. - Utilized condition-based logic to format symptom/test data for AI-powered analysis. - GitHub: github.com/acidG9/CuraScan 

DocNow 
Healthcare Appointment Platform React.js, Node.js, Express.js, MongoDB
- Full-stack healthcare appointment booking platform with role-based login (Doctor/Patient). - Implemented dynamic doctor calendar with real-time slot availability and booking system. - Integrated notifications for both patients and doctors with earning tracking for doctors. - GitHub: github.com/acidG9/DocNow 

Breezer 
Weather Forecasting App HTML, CSS, JavaScript, ReactJS
- Displays forecast with precipitation and temperature using an industrial-grade weather API. - Added extra insights like air quality index, UV index, and astronomical data. - Built with responsive UI to suit all screen sizes (desktop, tablet, mobile). - GitHub: github.com/acidG9/Weather-api 

Certificates

The Complete Full-Stack Web Development Bootcamp  Udemy, Nov 2023	Advance React  Coursera, Apr 2024
Developing front-end app with React  Coursera, Apr 2024	JavaScript for Web Development  Board Infinity, Jul 2023
