Percentage: 75%

Matriculation - CBSE,

Lawrence and Mayo Public School

2017 – 2018 | Kota, Rajasthan

Percentage: 90%

Skills

Languages

JavaScript, Java, TypeScript

Tools/Platforms

Git, GitHub, Postman, Vercel, Render, MongoDB

Frameworks Libraries

React.js, Node.js, Express.js, Tailwind CSS, Three.js, Zustand

Professional Experience

Software developer, MandelBulb Technologies

08/2025 – Present | Jaipur

- Developing efficient and engaging frontend experiences at Mandelbulb, while also contributing to backend solutions for seamless product delivery. Collaborating across teams to ensure robust web applications.

Front End Developer Intern,

ProjectX.Cloud (ProjectX Cloud Technologies Pvt. Ltd.)

03/2024 – 03/2025 | Remote

- Contributed to the Infinity OS platform frontend using React.js, focusing on enhancing UI/UX and performance.
- Collaborated in the end-to-end development cycle, including component architecture.

Projects

CuraScan, AI Health Diagnosis System | React.js, Node.js, Express.js, MongoDB 🔗

- Full-stack AI-powered disease prediction app analyzing 50+ parameters via Flask & OpenAI API.
- Implemented JWT and Bcrypt for secure user authentication.
- Utilized condition-based logic to format symptom/test data for AI-powered analysis.

DocNow, Healthcare Appointment Platform | React.js, Node.js, Express.js, MongoDB 🔗

- Full-stack healthcare appointment booking platform with role-based login (Doctor/Patient).
- Implemented dynamic doctor calendar with real-time slot availability and booking system.
- Integrated notifications for both patients and doctors with earning tracking for doctors.

AI Translate, A chatbot that translates any language | React.js, Node.js, Express.js, MongoDB 🔗

- AI Translate is an artificial intelligence-powered chatbot capable of translating text from any language into another.
- It provides seamless multilingual communication through an intuitive, conversational interface.
- The chatbot runs primarily in a web environment and leverages OpenAI's language model APIs to process and translate user input instantly.

Breezer, Weather Forecasting App | HTML, CSS, JavaScript, ReactJS 🔗

- Displays forecast with precipitation and temperature using an industrial-grade weather API.
- Added extra insights like air quality index, UV index, and astronomical data.
- Built with responsive UI to suit all screen sizes (desktop, tablet, mobile).

Certificates

The Complete Full-Stack Web Development 🔗

Udemy, Nov2023

Developing front-end app with React 🔗

Coursera, Apr 2024
